But ya, go ahead and put a ultralight reel on it. That'll feel goot.

yeah - can't see how the ross let alone the lamson will balance it..but you won't know until you try the combo. I tried both the lamson and the ross on my zaxis and found the lamson too light...the ross BARELY heavy enough to balance it...and that was in 5wt.

A 9ft 9wt A3 i would think would need something beefier to balance.
