Wulff triangle taper ambush line...It shoots.

I just installed on my 7.5 ft 4 wt rod the Wulff Triangle taper ambush line. Man it does shoot line with almost no effort. However when I double haul it my leader/fly makes contact with the line and sometimes gets tangled....Any suggestions? I think this line will work great on smaller streams where there is no backcast room and it shoots streamers well too. But the leader getting tangled on the line is a problem. Any suggestions?

Thanks,

Greg
