Trikes on the Tully!

Had a couple of very capable anglers out on the Tulpehocken this morning. Tricos were in the air and then on the water for a good portion of the morning and we locked on with quite a few fish. Female, male, and cluster patterns all took fish and then "picky" or otherwise moody fish were picked up on #20 Griffith's Gnats - go figure. CCAS beadheads took several nice rainbows before dry fly time. I am glad we got out b/c with this heat wave coming we will be on hiatus from coldwater fishing for at least the next 7 days.

Tight Lines!
