Lmao, why not get rid of the darn Dam. Nature always takes care of itself it's always man that messes things up..just look at the lower 48 Pacific Salmon, the damn Carp mess threatening the Great Lakes, Zebra Mussels , Didymo the list goes on.

What major reason of stupidity does this dam serve.....,saw that State is also abandoning the Susquehanna Shad reintroduction...get rid of the dams the fish will come back.I wonder what will happen to these mussels and the eels with this Marcellus baloney.Time will only tell.

Tight Wraps & Tight Lines
