Thats a good idea i drive an hour to work and 45 min. of that is the turnpike its a straight shot.....just kidding. so i'm from pittston and i have fished just about every stream, creek, and parts of the Susky in luzerne,lackawanna, and wyoming counties. now i'm workin out of my home and have to report to the agency every friday for the next two years at 9 o'clock. i think it is a waist of my time been it takes me a hour to get there and i am only there for an hour +/- . so usually i am free by 10. can any one point me in the direction of natives. i have never caught a wild trout only stockies and lots they say everything is better with natives Fight,color,taste etc. so from pittston to allentown off 476 i am free and probaly 60 min from 476 and allentown. (this post has nothing to do with the topic of this thread.)
