It seems the tips are too long so when I make smaller caddis or comparaduns the wings are too sparse.

I shot 2 bucks this year and no hair to show for it. I donated one hide to a guy who makes gloves and purses and the other went into the :( trash. What does it cost to tan a hide?

I did keep the patch of reddish brown hair from the top of his head and the ears with a thought of tying a deers ear nymph.
