I would also recommend tying your own leaders. You buy a leader kit from someone like Orvis (I swear by Super Strong tippet material) and you can build a hundred leaders for what you now spend for a dozen. The money you save there will let you buy good tippet material. Super Strong can be purchased in 100 meter spools for about 8 bucks and it lasts several season. I also prefer knotted leaders anyway, so tying my own makes sense there too!
