Pap-paw,

I've been there before...hate it...won't do it again. If I see another angler when I'm out it's too crowded for me (unless I'm fishing with other people of course). Part of what I enjoy about the sport is getting out and enjoying the solitude of nature, and not having to worry about giving the hairy eyeball to a schmuck trying to take "my" hole. Especially on the Breeches, there are lots of great spots that rarely get fished after April, and stay cool enough most of the time. They also have wild fish, not pellet heads. Plus you won't get in any fights (most of the time!)
