flythrower - yeah, that fish was a blast, especially on a 3 wt! It was probably in the 15-16" range.

Sasquatch - I've fished this particular section of the Breeches probably 6 or 7 times in the past 2 years, and have seen a grand total of ZERO other anglers while I've been out. A lot of out-of-towners fish this stream, and they usually stick to the famous areas. If you hit those spots, you very well may be tripping over other people, especially during hatch times. So if you're going to visit, I'd suggest exploring a little bit, just keep a thermometer handy if it's blazing like it has been recently.
