Sasquatch - The advantage to the C&R area is that the water temp stays cool because of the run coming out of the lake in boiling springs, and it gets stocked like crazy (if you're into that). That being said, that area is by no means the only stretch of creek that holds good fishing.

albud - I, too, don't like to see exact locations broadcast - not only does it increase pressure, but I think part of the fun and "adventure" of the sport is putting in the time to discover. When you find a jewel on your own, it makes it much more special.
