Yea who,

To answer your question about ATW, it stands for approved trout waters. It is stocked areas of a stream. These are the only places where you can harvest fish from labor day to february 28/29th (only 3 though). From march 1 to opening day it is unlawful to fish and harvest fish in these areas, unless it is also a special regulation area, i.e. catch and release, delayed harvest; however you can't harvest fish in special reg areas. Other areas like heritage, trophy trout, class a are open to fish year round, but can't harvest fish from labor day to opening day.
