There is a link below. Try as hard as I could to make it more elegant that is the best I can do. It is just google images with a search on zebra midges.

Here are some more photos that should give you guidance. And yes, just thread. I use the Uni thread 8/0. Sometimes I put a small collar, just a whisp of dubbing just next to the bead.

Keep this fly simple. Thread, rib, bead head. Also, I have come up with a really simple way to put the bead on the hook, I am going to have to take a few pics of that process when I get home!
