crystal meth fly?

I've read and heard some talk about a hot new fly for erie steelhead called crystal meth. So I decided to tie some.

The guy who runs the fly shop where I purchased the material even told me how great this fly works.

I tied a dozen the other night on size #14 heavy scud hooks in 2 colors - pearl and orange. Being a dry fly nut, I'm never impressed with any fly that doesn't float. But I have to admit that they look pretty nice. Kinda reminds me of rock candy.

In spite of the beautiful weather we're having, I have to work this weekend, and don't know when I'll be able to get to Erie to try them.

Just wondering if anybody has used them
