I'll take Corbett you can have good ol Martin OMalley. The dicator of Maryland. If you want to make a profit, privatize it. If you want it to go in the hole, let government run it. Haven't we all had enough of government. You can't run you're house hold the way government runs so why do you think they can run anything? More taxes that usually solves nothing.

That's the main dilemma voters face each election: Two ridiculous choices.

The government cannot run like a household nor can it run like a business. Those two models oversimplify our hyper complex government to the point of being foolish. That doesn't mean our governments can run huge deficits either. Some difficult choices need to be made to balance the budget and begin to reduce the deficit. In the short term we need to cut the fat out of spending AND raise taxes. The sooner we reduce the deficit, the sooner we reduces the tremendous interest on that debt.

As far as the state parks, forests and game lands are concerned, as long as they break even, I'm good with them. IMO, they are jewels in the state crown and a resource fo ALL to enjoy. If you think that makes me a socialist, I can live with that. The more land we set aside an preserve, the better. When we follow/worship the almighty dollar as the means and the end we doom the land and, by extension, ourselves.
