Gary nothing is showing for those links. well it shows but it just says it ended. Does not say what it is ending for. Also, I did not see a 9wt listed there. Everything that is below 200 is just being bid on, and will almost certainly go for over \$200.

Scroll down. Tilt didn't specify a model, just an A3 under \$200. I provided an answer. Although, it would appear two thirds are all the same vendor, Uptown_Angler. Is he an authorized dealer? Dunno, nor do I care. YP. Or, more appropriately, HP.

my PAFF friends

Too easy.

Anyways, if the rods are as magical as people say, they'll go up and value and lack of a warranty won't kill you. Stick it in the closet for two years. Either it'll double, or fall out completely. Keep it unfished and the plastic wrapped on it, though. I know you kept the plastic on it, that's how you roll.
