Like I said if they can be bought for \$185-\$200 which they clearly can be as posted in the above links, why would you try and sell it for \$250 other than to try and profit of guys on here.

He didn't. He offered to trade it. Also, while I was the one who found the value, I said sure you can get it for that much, but who knows how long it'll take? You can have it now, or you can have it later. Pay for the privelge, eh?

As to the veracity of that warranty, all the ad says it comes with a card. As has been pointed out, unless you meet requirements, well, its just a piece of paper. If we all want to be pedantic jackholes, its to be pointed that Becker's ad simply stated it came with an unfilled warranty card.

You don't follow along too well, I assure you Becker's "following" delight in laughing ~~at~~ ~~with~~ at his *shananigans* and aren't going to support him in anything.
