some generic basics of about all state parks . with the exception of the two largest parks in the state all run with operation cost greater then the revenue that they generate. the reason why they are supplied funding is that they are a huge economic base for other industry and sales that easily cover what is supplied to the parks. so what happens if you privatize the parks is either services decrease to cut cost and the facility becomes less attractive or prices (which are really reasonable)increase and push people out of what they consider reasonable.does the system work on the robbing peter to pay paul idea yea but in this case the existance of paul gives peter a greater amount of cash then he would have had without paul.
