Dear wg,

If you go I'm sure you'll be coming from the south. If you come in off Rte 934 and you see the signs for the first boat ramp just keep going if it is pickerel you are after. Drive all the way up to the 3rd park entrance and head in to that boat ramp.

From the ramp paddle down the lake and turn left into the first cove and work the edges of the weed beds in there. That's where I've had my best success for pickerel.

There is a "fish structure" right under the powerline that crosses the lake. I've caught some nice crappies around that spot while float tubing.

Good luck and depending on when you are there maybe I'll see you at the park this weekend.

Regards,

Tim Murphy 😊
