TM,

I'll actually be coming up 743 to 443. I hopped online, printed a park map and in true anal-retentive fashion, already laminated it. I'm amassing quite a collection of lake maps that I insert in my dry pouch on the kayak.

In doing some recon on the lake, I came across this link: [http://www.examiner.com/fishing-in-ha...
rea-fishing-memorial-lake](http://www.examiner.com/fishing-in-ha...rea-fishing-memorial-lake)

Looks like the northwest corner will be my first attempt. If you're there tomorrow, just look for the skull and crossbones on a tan 12' sit-on-top!
