If you're not already into fly rod building or know someone who assembles/wrap rods, Batson has a nice 6'6" 2wt RX7 blank for cheap.

I had a friend build one for me with a smallish cork grip, cork realseat and single foot recoil guides for under \$65.

The rod cast very well (my opinion) and I now overline to a 3wt line which helps in giving me tighter loops for casting under overhanging vegetation.
