Good hooks for small flies?

I have been tying a slew of flies in size 28 recently and have been using Mustad Signature hooks, which I really like. I have found that the size 28 though have been failing pretty easily though. I have had a few instances in the last couple of weeks where I had some hogs on that got off the hook only for me to find that they had bent the hook out. Now, I think this is a fly where I had already caught a fish or two. I have heard good things about Tiemco hooks and wondered if maybe that is a better brand for these small sizes. Let me know your thoughts.
