Second AFish-once you learn shooting heads you will love them as the fly is fishing,not swishing.

A good trick with heads is to over line 3 sizes.( for 6,11 for 8 etc.

Then cut back from the rear of the head[not the tippet] a foot at a time until you balance the rod.Only need to do that once,can repeat from then on.

This will give you the least length of fly line in the air.The thinner running line will greatly increase your distance.It works.
