I fish the sa express 400 grn. with a 26 ft. head. The intermediate runnin line does coil at feet or get swept down stream while your strippin it in. Unless you use a basket. S.a makes a streamer express long line I think its head is 50 ft. I just didnt want the 400gr head being spread out over 50 ft when i can get the weight in a short more compact head.
