I have a copy of the 1942 - fifth printing. I found this to be an insightful book. I am often reminded of excerpts from the book while I am on the stream from something I see or experience while fishing. It is a must read for every fly fisherman IMO.

After reading my 1947 copy I must agree with you about the book being a must read. It is amazing to me how so much of what Mr. Bergman wrote about still holds true for todays flyfishing! A GREAT Book.
