Tied up my first 2 scuds, any constructive criticism to improve on? I want to get more of buggy legs coming down without just relying on dubbing, but on that matter, any specific dubbing thats good for them thats loose and leggy? I was just using rabbit dubbing which is meh for that i think, I think if i can incorporate a way to have like the same hen hackle for the tail and antenna to shoot straight down for legs thatd be good.
