Fished up from metal bridge to the turnpike. Sunny/40 degrees didn't take water temp. Caught 3 and had on a couple more. All about 8-10". GRHE size 14, olive scud and size 20 generic emerger. Saw quite a few rises to midges. One hole I watched 10 actively feeding on midges. Ended up catching one of them on the emerger. A very nice day to be out.
