Been pouring over my copy too. Very in-depth, lots of technical info, including casting instruction for different situations/rigs. Some fly patterns, and a neat multipage spread of George's fly box. This is not just a look at "Euro" style either, plenty of space devoted to high stick tactics developed right here in PA. So far I am really impressed. This might be one of the better fly books I have read.

FG - I think Feather Craft Carries the ripper ring. I have never been able to bring myself to try it. I think it is a standard on furred leader systems. Not sure on that though.
