I go cheap and probably always will. I get a pair of sunglasses and within a couple of outings I have a scratch in the lens. I've done it with expensive and cheap glasses. I love the walmart ones for like \$12. I wouldn't mind getting an amber lens pair sometime but I just can't justify spending much money on glasses when I go through a pair every year and I always keep a spair pair just in case I really scratch my lenses up.
