I just picked up another pair of sunglasses a few weeks ago at Gander Mountain. They are the 'Fish Eyes' that they have on the big rotating displays in the front of the store. Ran me around \$15, they work good enough for me, but I am thinking of getting another lighter tint pair for fishing back along places such as clarks where even on the sunniest days it is dark along the creek. My last pair of them lasted almost a year before I lost them during the late rabbit season.
