Dear yea-who,

What a cool screen name, three thumbs up for that. 😊

If you don't need prescription sunglasses the Babe Winkleman "Flying Fisherman" glasses for about \$ 20.00 do a marvelous job.

Back when I wore contact lenses and could actually see I had that "raccoon" face from sunburn and I loved those glasses. there were none better.

Now that I'm blinder than three bats I have to have prescription glasses to see and I figure this go around I'll go with Smith/Action Optics so long as they make glasses in my script?

I wish they would make a pair like the old Babe Winkleman's I had, I really miss the raccoon eyes. They told a lot about the person who had them.

Regards,
Tim Murphy 😊

Same pain here Tim. Geeting old sucks. I have to give the Smiths a try. At some point I'm going to give up and get lens implants.
