I alternate between \$16 mini market shades and \$20 tackle shop models. I'm pretty sure they are all made in the same place. I go through about a pair per year, but then I always have a few spares that aren't worn out yet to loan to buddies or use if I leave mine at home. I know for a fact that if I buy good ones the Jack factor will come into play, so I just keep getting the cheepies. They work for me.
