George Daniels (a PA guy) is coming out with a nymphing book on January 1. It has a section on Czech in it. I don't know how his writing is but I saw a presentation of his at the Penn's Creek TU banquet last year and he was very good. I already pre-ordered the book.

I just purchased this book it's great. Very focused on technique. The book doesn't get bogged down in lengthy discussions about hatch matching. George does a great job explaining what to do, why to do it, and what is actually happening during the drifts. Also very good explanation of use of weight. The whole book is a nice departure from the normal instruction on using nymph/indicator rigs.
