paul,just keep in mind this is a tough stream.

i break it into to parts

washington's headquarters up to falls.

laffayettes headquarters up to little valley.

it always seems strange to me the apparent lack of fish from little valley downstream to that sharp turn in the creek.

i caught a fourteen incher in little valley once but have never even seen a trout in the area i describe.BUT,it looks like a place with the deep holes and undercuts that would produce big browns.
