URL:

This was one I came across on Kettle Creek on April 27, 2010 at about 3:00 pm. Again size #14 or even maybe a #12. It was a cool and sunny day.

Common Name: March Brown

Latin: Maccaffertium vicarium

Hatches Late morning - evening, early May - late May

Tails: 2

Fore wing: molted

Hind wing: present

Hind wing costal: yes

Body length: 12-14 mm

Hind wing costal bump: present or absent

Flat head: yes or no

Time of day:

Date:

Body Color:

Freestone streams: Kettle,
