Yes - 800 x 600 is small enough. Take a look at the pictures you posted in this thread - the file size is next to the photo file name.

**Last night, the maximum allowable file size was 150 KB. Now, it's back to 1000 KB.**

**The following file is is 643 KB. Last night, it wouldn't upload - I had to use photobucket to post it. Today, it uploads with no problem.**

**Somebody's messin' with us. :lol:**

Lol...no messing. Dave R. requested a bump to 1000kb and it bumped it for him (and all) to post pics.

Thanks to all for posting stuff in the forum. We are in the process of figuring a way to sort it all out and put into stickies to use as a reference for all members.

Good stuff!

FYI - The photo size limit has been reset to 150k. It is recommended that photos submitted be downsized by the poster to 450 x 450 pixels at 72dpi. This is necessary to control the file space consumed on the server by the number of photos posted in this forum.

Sorry for the inconvenience.
