Dear Board,

I don't want to hijack albatross's thread but I have a couple of quick questions for Wulff-Man and FishIdiot and anybody else who wears those "fit-overs" or the similar "cacoons."

What about summertime fishing? Do you find that you have two pairs of glasses that get steamed up? I have trouble with sweat dripping in my eyes and on my glasses when I wear one pair and I'm wondering if it gets worse wearing two?

I've thought about the "fit-overs" because I know my next pair of glasses will have to be bifocals and I really don't feel like paying the money for prescription bifocal sunglasses if there is a reasonable alternative.

Regards,

Tim Murphy 😊
