This is a fantastic new forum. I have one suggestions though. I think it would be best to keep the titles in the same format as the stream reports section (Common bug name - County - Stream Name - Date). It would make it much easier to browse by titles.

And on a similar topic, I always thought the Professional Stream Reports forum titles should follow the same format that is used in the standard Stream Reports forum. It has become more about promoting a guiding service than giving specific professional stream reports and conditions IMO. Afterall, they are the pros. They should be able to provide more detailed stream info.
