I was at a book store the other day and was checking out a few books that looked pretty decent. I'm looking for a good book to identify the real insects to the tied version. The book I found that looked the best was "handbook of hatches". Also saw a book called "the fly tying bible" it was spiral bound and had I believe 100 patterns in it. Just wondering if anyone has seen or read these books and if they recommend them. thanks for the help!

Ryan
