Hey all:

I am going to be spending a week this summer at the outer banks, Ocracoke, NC and want to try my hand at fly fishing. I am planning on bringing my Kayak and using that as my fishing platform.

My question is: What is a a basic rod/ reel/ line combo for saltwater? I have an 9 ft 8wt that I use for steelhead. The reel I am using is good for the salt. I have a wf floating line on it. Will this rig work? Should I by a saltwater line/ sinking line?? I am just not sure as what to bring. Money is a little tight right now and I'd hate to spend on something that I don't really need.

Thanks
