Fish fly

Author: : sandfly

Date: : 2012/2/3 8:09:20

URL:

Species: *Nigronia fasciata*

Family: Corydalidae

Subfamily: Chauliodinae

Length: typically about 22-28 mm

Range

Eastern North America. *N. serricoris* is widespread. *N. fasciatus* is widespread, but absent from the upper Midwest and southern Canada.

Habitat

Streams and nearby vegetation. *N. fasciatus* is restricted more to small streams with very good water quality (1).

Season

Spring--May at lower elevations in North Carolina, May-July at higher elevations
