^^Everything you ever wanted to know. Down the page a bit is the list of broods, you can click and get a map of where they are. The big PA brood is XIV, and won't happen again until 2025.

This year will be brood I. Folks in SC PA, very close to the WV, MA border, may get in on some of the action. Next year the greater Philly area may get some. The extreme SW corner gets some in 2016. And western PA, including the ANF, in 2019. Most of the SE portion of the state goes in 2021. And then the big "most of PA" brood in 2025.
