Capped at \$900, but what Hyde does is just increase the cost of their boat. I know when I tried dealing with them they were offering little incentives. 10% of retail for a demo boat or last years model is not a good deal. I went with clack and they shipped mine to Michigan for basically nothing. I'm picking mine up in 3 weeks!

That's good feedback. I didn't get that far in my discussions, yet. I know Clacka has distributors in Michigan and Maine. Smart move going that way. Best of luck with the new boat! What model did you get from Clacka?
