I have asked my wife, repeatedly, if she would like to ff. Her response, "absolutely not."

However, she loves reading streamside and watching. Quite possibly, she is sitting streamside and mentally spending insurance payouts. lol

My granddaughter is asking "when our we going ff, Poppy." This year we will.

Be sure to get out with the granddaughter as much as you can.

They grow up fast and change interests.

Mine used to love to fish with me. Until she started getting into her video games and whatnot.

She's a teenager now, and going fishing with pap is probably the last thing on her mind.
