I have taken a few out to throw flies; no luck in the having the dexterity or coordination to throw a decent loop. They do learn the roll cast and catch fish stripping streamers. Wild freestone streams- forget it. I bring them to help w. the camera if I decide to shoot that day.

When Sadie was 9 months pregnant she was still out on the water with me, in her orvis sling pack with water bottles, watching dry fly action. I thank my significant other enjoys the outdoors. I do, however, thank god I don't have to share the dry fly sections/drifts.
