I bit and bought Ed Engle's "Fishing Small Flies" after reading the hardcopy of "Tying Small Flies". I was pleased with the results. Some of the illustrations were slightly out of sync with the text, but being B&W they worked and were surprisingly clear. I believe I would be disappointed with the Kindle edition of "Fishing Small Flies", which has MANY pictures and illustrations.

As far as "lending" Kindle books... between the wife and I we have at least 100 books. New, old, etc. NOT ONE of them is lendable. fergetaboutit. We just swap Kindles for a time.

I also bought the Google book, Wilderness Press's "Fishing Colorado". What it amounts to is a large PDF file that is not searchable. I may do the same for my copy of the same publisher for "Pennsylvania" by Wolf. Given our 5th wheel has limited cargo capacity it may be best to have some of these reference books in electrons rather than ink. The Google books are only \$8, pretty good value. You can also read them on any device that connects to the internet.

Cheers,
RBT
