Tim,

Thanks again. I'm not a total novice when it comes to bamboo. I built one in the early 80's from an Orvis kit given to me for birthday or Christmas by my then wife. Loved building it and really loved fishing it. Think it was an 8', 4 weight. Anyway, it was stolen from my car in New York City when visiting two women from Germany we met in Ireland while Salmon fishing. How about that story!!!! Sad thing about it.....it's true.
