Ive had several occassions to use this "tactic" when Ive fished on a new stream and sometimes one's Ive fished quite often.I keep my eyes out for flies fisherman have broken off. If I have not had much success on my own flies ,Ill tie on the ones Ive found.Quite often it is a slightly different pattern or sometimes something I would have never thought of using.Several times this has saved the day.I then copy the pattern and add it to my arsenal.
