I tied mine with 14/0 black thread, three strands of antron off the back for a trailing shuck and like 4 or 5 CDC barbs for the wing. I'll Fanny them up and see if I can see them. if not, I'll try a size 24 para midge (which I can see) or the 20 BWO with 12 to 18" off the back for the midge. I may not catch anything but I'm sure as heck gonna have a bunch of things to try!

Thanks guys.
