As the creator of the GPS Fishing Guide, let me chime in. I am probably the one who did the demo with you in Harrisburg. We now have the full suite of Garmin, Android, and iPhone apps available. Unfortunately I've been traveling so much that I haven't gotten to updating the links on the landing page for our ad. I'll hopefully have that done by this week. Below is a link to another discussion with a member who does have the GPS Guide.

If the link doesn't work, search "Gogal"

I will be at the Jaffa show in Altoona and then at the Erie show if anyone would like a demo. You are right about there not being any ratings on the apps. That is very common with a new app such as ours. We're hoping that will change in coming months but those who bought the app will need time to use it a bit before they feel comfortable rating it.
