I'm not sure how many of you subscribe to this magazine, but I just wanted to give "props" to it for being a quality publication. It's not a fly fishing magazine, but they always have a few good fly fishing articles as well as a pattern in it. For someone like me who kayak fishes, fishes for warmwater species as well as trout, it is well worth the annual subscription (\$12). It's only published bi-monthly, but I anxiously await each edition. I used to subscribe to some of the other fly fishing magazines, but found it hard pressed to justify the cost/benefit. This is one magazine I feel I get my money's worth.
